Develop The Web Application Using Node-RED

TEAM ID: PNT2022TMID22325

Aim: Develop the web application using Node-RED Steps Followed:

• Opened a Node-RED project

• Added code to get child location in python

```
import json
import wiotp.sdk.device
import time

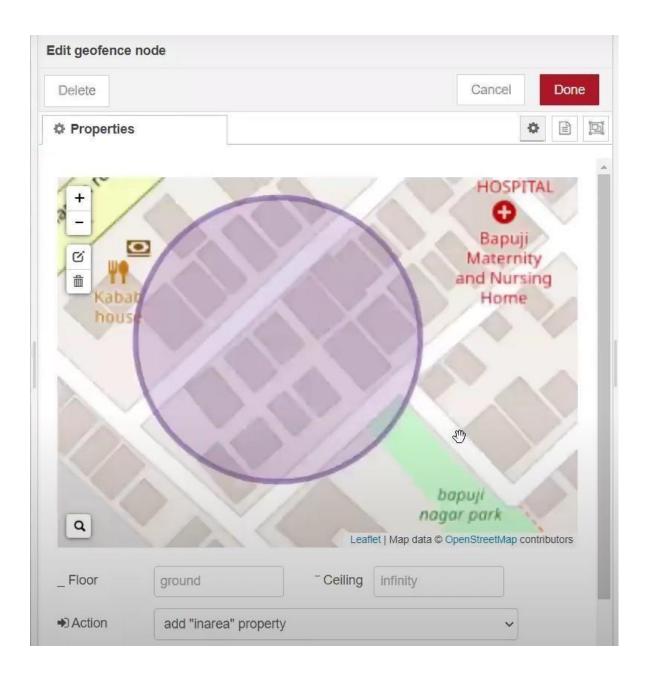

myconfig = {
    "identity": {
        "orgid": "hjsfmy",
        "typeId": "NodeMcU",
        "deviceId": "12345"
},
    "auth": {
        "token": "12345678"
}
}
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

fhile True:
    name= "Smartbridge"
        fin area location
        latitude= 17.4225176
        longitude= 78.5458642
        fout area location

        flatitude= 17.4219272
        flongitude= 78.545873
        myData=('name': name, 'lat':latitude,'lon':longitude)
        client.publishEvent(eventId="status", msgFormat="json", data=myData, gos=0, onPublish=None)
        print("Data published to IBM IoT platfrom: ",myData)

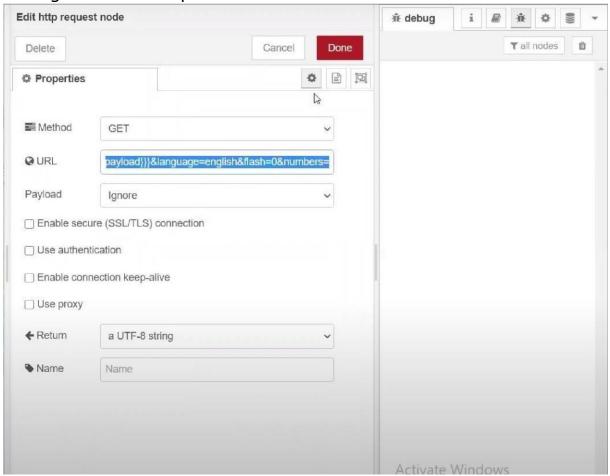

client.disconnect()
```

Created the GeoFence

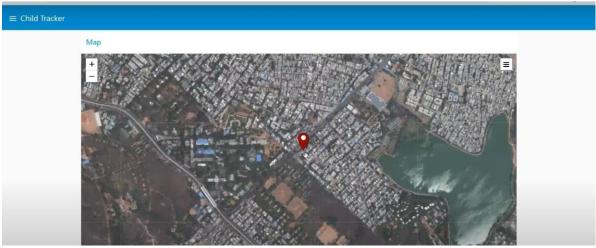

•

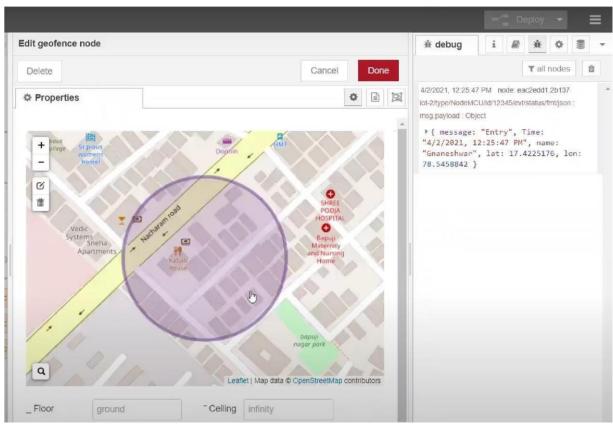

Editing the HTTP Request URL

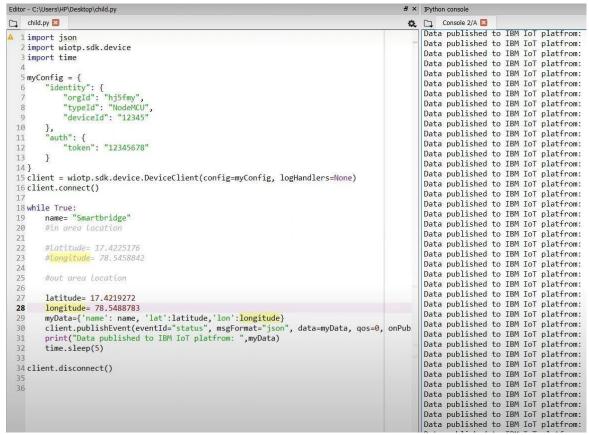

Located the child

Created the geofence node

Python script sending requests to IBM Cloud

After running the script, the web UI shows "Person is not in the particular area"

Result: Successfully developed the web application using Node-RED
